

Kell & Rigby Pty Limited – Aged Care

Kell & Rigby is a leading Australian, family owned, construction company with offices in Sydney and Canberra. Over 94 years Kell & Rigby has earned a reputation for integrity, dependability and design & construction excellence.

In 1988 Kell & Rigby was the prize contractor on Australia's Parliament House and in 2000 was one of the major stadium contractors for the Sydney Olympics.

In the last ten years, Kell & Rigby has worked on numerous projects in the Health and Aged Care sectors including work with organisations such as Anglican Retirement Villages, St Vincent's and Royal Prince Alfred Hospitals, The Uniting Church and several private Nursing Home developers. Our track record includes a number of challenging nursing home conversions and refurbishments, in addition to the construction of new, 'green-field' Aged Care and Hospital developments ranging in size from 10 care beds to over 100.

As a result of the increasing demand for both new and upgraded Aged Care facilities throughout Australia, Kell & Rigby has taken significant steps towards establishing two business units focused on Health and Aged Care projects. In line with Kell & Rigby's goal of becoming one of the most admired Australian companies by 2020, our aim in both these sectors is to provide the best construction service to our clients, at all times.

Across the company our approach is to build partnerships with our clients and ensure that communication lines between all parties concerned with our projects remain open at all times. Information and issues relating to design, financial and contractual aspects of a project are always shared and discussed as objectively and as transparently as possible.

Through the partnerships Kell & Rigby has developed with experienced professionals and government representatives in the Aged Care industry, we continue to build on our strong understanding of the financial, regulatory, operational and care issues faced by owners and managers of these facilities.

We are excited by the opportunity to assist the industry to provide an improved standard of care – not presently available to Australia's aging population. By delivering quality buildings which allow positive initiatives such as healthy, active aging and wellness programmes to be offered to residents, we believe a far higher standard of care is sustainable throughout the industry.
