

*Aged Caring
made simpler,
faster and more
accurate.*

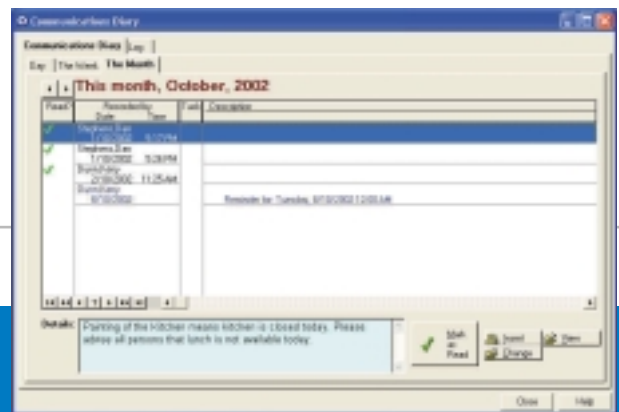

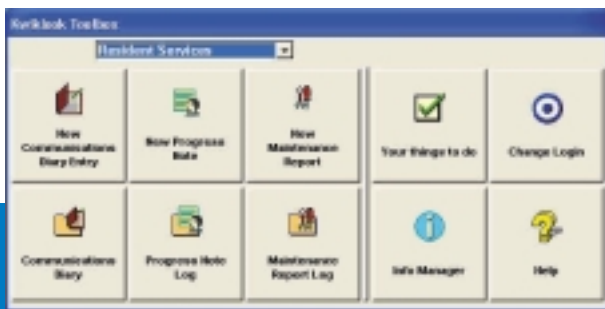

TAKE A QUICKLOOK AT KWIKLOOK™

kwiklook®

WHAT IS KWIKLOOK?

Kwiklook™ is a new software package created specifically to reduce time and increase accuracy in Aged Care and Nursing Home record keeping. With Kwiklook, staff can devote their time to resident care and management.

STAFF MANAGEMENT ISSUES

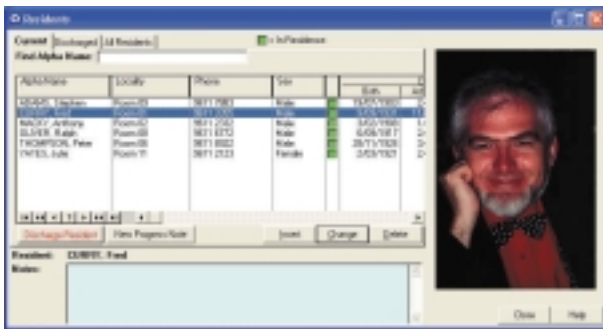

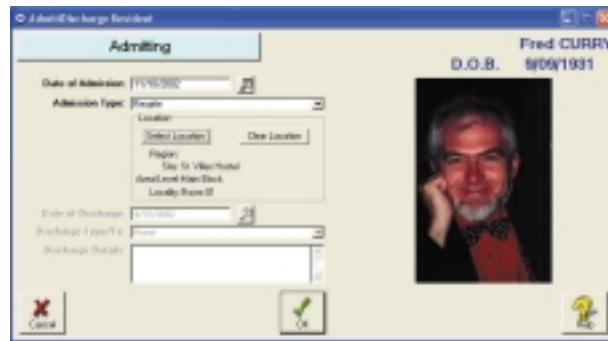

- Kwiklook automatically records exact time of start and finish of each staff member's shifts.
- Kwiklook even alerts staff if they haven't signed on or off for the previous shift.
- Accurately records staff attendance or absenteeism.
- Takes the time out of preparing timesheets. Data can be exported to any payroll system.

COMMUNICATIONS DIARY BLUES

- Say goodbye to time-consuming paperwork: Kwiklook Communications Diary automatically logs essential data (date, time, location, resident's name and details) freeing staff to do what they do best – care for residents.
- Ensures high standard of duty of care: administrators have instant access to staff entries.
- Previews scheduled activities and reminds all care staff of appointments.
- Management can check that all entries have been read by incoming shift workers.

MAINTENANCE REPORT LOG JAMS?

- Speeds and simplifies maintenance report log documentation.
- Provides clear, easy to read records whilst ensuring optimal security, privacy and confidentiality.
- Follow up of each entry easily traced.
- Management can quickly identify time taken to address each entry and identify types of entries made (eg plumbing, electrical etc).

Kwiklook™ is a user-friendly programme, simple to install and easy to operate.

PROGRESS NOTES:

- Instant access to documentation including photograph, doctor, progress notes, next of kin and other vital data.
- Forget messy paperwork and illegible handwriting.
- Just log on for automatic recording of date, time, name and carer's designation.
- Dramatically speeds up weekly and monthly audits.
- Ensures security by eliminating unauthorised changes to resident details.

- Individual log in and password for all carers.
- Search-by-date facility allows instant access to incident data.
- Reduces the risk of human error in documentation.
- RCS details instantly accessible, management alerted to due by dates one month prior to expiry.

TOURS WITHOUT TEARS?

- All duty of care tours automatically recorded, night and day.
- Accurate, time and date stamped record of all locations visited.
- Security improved: Kwiklook identifies areas missed on each round.
- Records staff locations during the time of emergencies.
- Saves staff time (and tears!)

*“Pre-Kwiklook: Documentation was time consuming.
There were possibilities of non-compliance with legislative requirements, issues with legibility and archival storage.
Monitoring activities were time consuming for management.*

*Post-Kwiklook: More efficient documentation processes.
There is now greater security of information and a much more streamlined auditing process. More efficient communication systems and increased privacy of sensitive information are other benefits Kwiklook provides”.*
